The Tübingen Faculty of Medicine and University Hospital are part of the University of Excellence Tübingen. They provide medical services at the highest level and cover the entire spectrum of modern medicine, research, teaching and clinical care.

The Faculty of Medicine at the University of Tübingen invites applications for a position at the Institute for General Practice and Interprofessional Care as a

**Full Professor (W2) of Ambulatory Care Research with a Focus on Secondary Data**

available immediately. This position will be filled on a salaried basis and will be made available for a period of six years according to section 50 subsection 2 sentence 1 no. 5 of the Baden-Württemberg state law covering higher education and specifically the promotion of highly gifted junior researchers.

We seek a qualified personality with extensive research experience who represents the field of health services research with secondary data in the context of ambulatory care in research and teaching. The job holder should have proven knowledge and expertise in the application of modern statistical methods in the analysis of health and care data for broad clinical and health economic issues, in particular regarding primary care and cross-sector health care research. In addition, the person sought is expected to work on research questions, especially in the context of the German healthcare system, in an interprofessional and interdisciplinary manner, and to take a cross-sectoral and systemic perspective.

Tying into the research focuses of the Institute for General Practice and Interprofessional Care, the Faculty of Medicine and the neighboring faculties at the University of Tübingen, he or she is responsible for nationally and internationally visible research on structures, processes and outcomes in the field of ambulatory healthcare. The institute provides ideal conditions with available large data sets as well as existing collaborations with cost units, the BMBF-funded general practitioner research practice network FoPraNet-BW as well as the cross-sectional area of prevention and health care research at the Faculty of Medicine. In addition, the professorship should contribute to the research and teaching activities of the Center for Public Health and Health Services Research (ZÖGV).

Required qualifications include a university degree in life sciences, natural sciences, social sciences or economics or comparable disciplines, as well as postdoctoral qualifications and teaching experience equivalent to the requirements for tenure and leadership skills. The future job holder should have outstanding scientific credentials as evidenced by publications and third-party funding.

In the field of teaching, comprehensive experience evaluated as outstanding and involvement are expected, as well as active design of lectures and other teaching formats, particularly in view of innovative curricula in the degree programs taught at the Tübingen Faculty of Medicine. The position has a teaching load of nine hours per week during the semester.

The University of Tübingen is committed to equal opportunity, diversity and inclusion. Female scientists, in particular, are explicitly invited to apply, as are applicants from outside Germany.
Applications from equally qualified candidates with disabilities will be given preference.

General information on professorships, hiring processes, and the German academic system can be found here: https://uni-tuebingen.de/en/213700.

Please submit your entire application using the web-based application platform https://berufungsportal.medizin.uni-tuebingen.de. The deadline for applications is July 20, 2023.

Enquiries may be directed to the Dean.
